Effects of digitalisation on the collection and processing of data for law enforcement purposes

“It's the act of getting the right information, at the right time, to the right person, with the goal of furthering an agency's mission. The technology simply enables the mission.”*

*Mark Rogers, Senior National Security Adviser, Cisco

Law enforcement must rapidly become a more technologically adept and driven service

A black and white photograph of a man with dark hair and glasses, wearing a light-colored lab coat over a striped shirt. He is leaning forward over a desk, looking intently at a computer monitor. His mouth is slightly open, suggesting surprise or shock. On the desk in front of him is a white plastic bag containing a small white object. In the background, there are several framed portraits on the wall and another computer monitor. The overall atmosphere is one of intense focus or discovery.

Vast abundance of data

Standards

A photograph of a paved road curving through a landscape. The road has yellow double lines and is bordered by a green metal guardrail. To the right is a body of water with blue and green hues, and tall, dry grasses. In the background, there's a dense forest with many trees showing autumn colors like red, orange, and yellow. The sky is clear and blue.

The road ahead
